

Single block concrete shelter
Underground technical room
Easy and secure staff access
Cable entry and exit 100% waterproofed

Main advantages

- Customized inner design
- Full integration from factory ensures homogeneous quality
- Can house different technologies
- Outstanding antivandalism solution
- Best use in urban or industrial areas
- Zero visual contamination

Markets / Applications

- Telecommunications
- Gas, water networks control
- Meteorology stations

Technical specifications

Inner dimensions (HxLxW)	2.3 x 5.9 x 2.2 m
Outer dimensions (HxLxW)	3.4 x 6.1 x 2.4 m
Weight	29,800 kg
Container	Single block structure reinforced concrete shelter Internal space equivalent to technical room Multidiameter cable entry seals Special underground technical floor / concrete floor with access covers Ventilation chests, different models Space reserved for upper termination upon environment Inclined access ladder
Shelter access entrance	Easy opening and closing Codified access key Staff access entry useful dimensions 1.3 x 0.7 m
Lower bay	Lower in warehouse for cable intakes with inclined floor for water collecting to draining pump

Integration

Customized integration	Electrical installation Optical fiber integration Alarm units Trays Security systems	Gas detection systems Ventilation systems Air conditioning Waterproofing systems Energy systems
